

PROFILE SUMMARY

Experience

- Server site application Developer with over 5.10 years of experience in the field of IT with focus on Software Development of web applications and interactive software products using Java/J2EE, Struts, Spring, Spring boot, Hibernate Framework with Usability standards.
- Having experience in handling team member and guide them to achieve goal and also responsible for deciding how to approach tasks and develop a plan to accomplish them.
- Hands on experience in building application using Spring CORE, Spring MVC, Spring boot, and Hibernate Framework.
- Hands on working experience in Java 8 and Java 9.
- Good experience in integrating with application using RESTful Webservices.
- Good understanding of Design Patterns.
- Experience in working with various RDBMS like Oracle, MySQL and PostgreSQL.
- Hands on experience working on Java Multithreading, Concurrency Package.
- In the recent past have been working on the Blockchain technology has strong understanding of core Blockchain concepts.
- Hands on experience in developing Chatbot by using Microsoft LUIS Framework and QNA Maker.
- Worked under agile process of software development using JIRA, Bamboo for CI/CD and version controls like GIT Lab.
- Expert knowledge on Banking, Hospital domain, Telecom domain.
- A history of successful web design & application development and consultation.
- Strong people skills with the ability to assume leadership roles in team environments.
- Involved in daily SCRUM meetings to keep track of the ongoing project status and issues.
- Good team player, self-starter and have ability to work independently, interpersonal skills, commitment, result oriented hardworking with a quest and zeal to learn new technologies and undertake challenging tasks.

Technical Skills

Languages	Core Java,J2EE.
Frameworks	Struts, Spring, Spring Boot, Hibernate.
DB	Oracle, MySQL, PostgreSQL.
Server	Apache Tomcat, JBOSS
IDE/Tool Used	Eclipse, Notepad++, NetBeans, Atom, Visual Studio, WebStorm, IntelliJ IDEA
Report Tools	Jasper (iReport)

Educational Qualification

Bachelor of Engineering	2013	Computer Science Engineering
-------------------------	------	------------------------------

EMPLOYMENT HISTORY

6D Technologies, Bengaluru

Technical lead: April 2020 - Till now

A.D.S Solution Pvt. Ltd, Bengaluru

Associate Software Engineer : October 2018 – April 2020

Integra Micro Software Services Pvt. Ltd, Bengaluru

Senior Software Engineer: December 2017 - October 2018

Integra Micro Systems (P) Limited, Bengaluru

Senior Software Engineer: January 2015 - November 2017

WORK EXPERIENCE

BSS

April 20 – Till Date

Business Support System

BSS deals with the taking of orders, payment issues, revenues. It supports product management, order management, revenue management and customer management. It consists of all the different types of components that a telecom service provider uses to run its business operations for the users.

Responsibilities

- Understand new requirements for building the portal and develop prototypes for sign off.
- Handling team and guide them to accomplish a task.
- Used Java, Spring Boot and JPA for exposing API.
- Involved in writing Business Logic, Service classes and data access layer.
- Coordinated with UI team, QA team, Product Owner and Senior management to refine requirements and address issues

Environment : Java, SpringBoot, Spring JPA, Eclipse JavaEE IDE, Agile.

CCMT

Nov 18 – March 20

Swiss Re

Control Change Management Tool

This is a part of Risk Management called GRACE (an IBM product). Risks have controls, And the controlled changes of the GRACE control library via a request and approval interface is what CCMT does.

Responsibilities

- Understand new requirements for building the portal and develop prototypes for sign off.
- Used Java, Spring Boot and Hibernate to make web pages dynamic.
- Involved in writing Business Logic, Service classes and data access layer.
- Coordinated with UI team, QA team, Product Owner and Senior management to refine requirements and address issues
- Handling full post development support.

Environment : Java, SpringBoot, Hibernate, Eclipse JavaEE IDE, Agile.

EHR

Apr 18 – Oct 18

Bangalore University
ಬೆಂಗಳೂರು ವಿಶ್ವವಿದ್ಯಾಲಯ
BAKAC ACCREDITED WITH 'A' GRADE

Electronic Health Record Management System (Blockchain - Ethereum)

The EHR system design gives patients an immutable log of their medical history, which is not only comprehensive, but also accessible and credible. This restores patient agency, as participants are now more fully informed of their medical history and any modifications to it. Through permission management on the Blockchain, we enable patient-vetted data exchange between medical jurisdictions and an interoperable content management system for the physicians supervising these records. The Blockchain ledger keeps an auditable history of medical interactions between patients and providers.

Responsibilities

- Requirement understanding, discussion with seniors and team members.
- Handled setting up the Blockchain System
- Involved in developing rest API's using Restful API.
- Involved in Producing and Consuming RESTful Services.
- Involved in writing Business Logic, Service classes and data access layer.
- Database design
- Used RestFul API as Middleware to interact frontend as well as backend.
- Involved in deployments , doing R and D and helping team for development

Environment : Java, Spring, Hibernate, Eclipse JavaEE IDE, Agile,GIT.

PPM

Jan 18 - Apr 18

Professional Promotional Management

This 'Professional Promotional Management' application is a ChatBot application that will be used by consumers for getting the status and updating the status related to the promotion and payment ID.

Responsibilities

- Requirements analysis and development
- Involved in developing chat module
- Involved in developing the user Interface and code implementation.
- Involved in customer interactions / meetings related to technical discussions

Environment: Java, Spring, Hibernate, LUIS.

LoanBot

May 17 – Nov 17

LoanBot

LoanBot powers the eCO web-portal from where Financial Institutions can target all or specialized categories of people from their region of operation. It helps Banks and other institutions to popularize their schemes and available deals; request third-party services (e.g. legal services); and process machine vetted applications. Customers can apply to several institutions at a time and are provided the facility to choose a financial partner of their choice.

Responsibilities

- Involved in developing Chat module by using LUIS.
- Involved in writing Business Logic, Service classes and data access layer.
- Created Report using iReport.
- Involved in Database design and writing queries.
- Developed in generating report using iReport(Jasper Report) API.

Environment : Java, Spring MVC, Restful Webservices, Hibernate, MySQL, Jasper and Eclipse IDE.

CKYC

Dec 16 - May 17

Central Know Your Customer

Central KYC Registry is a centralized repository of KYC records of customers in the financial sector with uniform KYC norms and inter-usability of the KYC records across the sector with an objective to reduce the burden of producing KYC documents and getting those verified every time when the customer creates a new relationship with a financial entity.

Responsibilities

- Involved in coding and designing GUI as per requirement specifications.
- Involved in writing Business Logic, Service classes and data access layer.
- Implemented Scheduler Job.
- Working in close coordination with Client to resolve issues arising using agile methodologies.
- Coordinated with QA team, Scrum master, Product Owner and Senior management to refine requirements and address issues.

Environment: Java, Spring MVC, Hibernate, MySQL, JavaScript, Eclipse JavaEE IDE.

iAS-Web
Apr 16 – Nov 16

Integra Authentication Server

iAS-Web is application which provides a multifactor authentication for the user like biometric login, iris login or using password.

Responsibilities

- Redesigned the existing authentication for generic fingerprints (ISO Certified) and to create new interfaces.
- Provided multifactor authentication for user for more secure environment.
- Implemented Action classes & Business Layer.
- Involved in coding and designing GUI as per requirement specifications.
- Responsible for content and UI development.
- Worked in a team, involved in developing the UI layout and front -end programming for web design that matches requirements.

Environment: Java, Struts, JDBC, PostgreSQL, JavaScript, Netbeans.

gDEP
Sep 15 – Mar 16

Getaway of Data Exchange Portal

gDEP is application which facilitates an end user a new customer to associate with Bank. The application provides a web interface for enrollment of customer.

Responsibilities

- Worked in a team, involved in developing the UI layout ,front -end and backend programming that matches requirements.
- Involved in writing Business Logic, Service classes and data access layer.
- Handling of production issues..

Environment: Java, Spring, Hibernate, MySQL, JavaScript, JQuery,HTML, CSS.

iCIA

Sep 15 – Mar 16

Customer Information Authentication

iCIA is application which facilitates a bank user to connect with the portal using SSO. The application provides a web interface for bank guys to address the customer's online application form as per the Branch/Region accessibility.

Responsibilities

- Implemented Single Sign on (SSO) to interact with the application.
- Implemented Scheduler Job using Quartz API.
- Involved in writing Business Logic, Service classes and data access layer.
- Written JSP as per requirement .
- Developed the application as per client requirement.
- Generating reports related to User data.

Environment: Java, Spring3.x, Hibernate, MySQL, JavaScript.

IPMS

Jan 15 – Aug 15

Integrated Project Management System

Integrated Project Management System (IPMS) provides a complete ERP solution to the South-Western Railways. It is migration project from the existing FoxPro system to Oracle 11g with a web interface.

Responsibilities

- Understanding of FoxPro screens and prepared Flowcharts' and documents for development.
- Developing the Work Orders module in PMS.
- Developed complete Payroll Management System and handled complete PPMS module.
- Generating reports related to User data.

Environment : Java 1.5, JSP, Struts2, Oracle, JQuery, Jasper JavaScript.
